---

I promised I would write a recommendation should you wish to use it on your website. Please see below in quotes:

"We had just bought a house and had been living in for a few months and of course at inspection our foundation was flawless, now 4-5 months later our 17 year old house is starting to show its age. Well I had noticed some cracks in walls and floors and decided I needed someone to look at our foundation to give us first time homeowners some peace of mind. Dodson Foundation Repair was the first one on the list and the first to reply. I was nervous at first on what our inspection charge would be as some companies charge upwards of \$250 just to look at your house! Outrageous! Well imagine my surprise and delight when Mr. Dodson said he would not accept any money for just coming out and taking a look. I was floored. He showed up on time (on a Saturday too!) and was very professional and a gentleman. He was thorough and honest in his explanation of what he was inspecting. Turns out our home was just in a state of flex/settling. Whew! I bet other companies would have sold me on a few piers I definitely don't need at this time.

Highly recommend Mr. Dodson and will be referring him to my friends and neighbors."

Subject: Slab foundation cracks - RFQ

Good morning,

We have moved into our 17 year old home a few months ago and we have since noticed cracks forming in the foundation of the house. These cracks however seem to be coming from the center of the house. No visible cracks on the outside of the house. We also have noticed new cracks in the corners of the windows

and trim/crown moulding as well that was not there before. We're needing to get an evaluation of the situation.

We are in Waxahachie, we have a concrete slab foundation.

I am available anytime and can be reached at: 832-4198-6255

Thank you.

Andrei Bucur
